

Please consider that the Petition for Stay and a Petition for Emergency Clarification filed by ASAE is important to allow more time for the agency to consider the impact of these regulations on the business world, including associations.

As a small association, we rely on the use of FAX to keep our members and prospective members informed of our meetings. The need to keep a document PROVING we have permission to send a fax would be costly in time and money. We are a not-for-profit association meeting the needs of our members who are primarily small business owners. This new requirement could be very detrimental to our communication efforts.
